Thu, 11 Oct 2018 03:10:00 GMT - The gene-centered view of evolution is a model for the evolution of social characteristics such as selfishness and altruism.. Acquired characteristics. The formulation of the central dogma of molecular biology was summarized by Maynard Smith: . If the central dogma is true, and if it is also true that nucleic acids are the only means whereby information is transmitted between generations, this ...

Tue, 21 Jun 2011 23:57:00 GMT - In biology, a gene is a sequence of DNA or RNA that codes for a molecule that has a function. During gene expression, the DNA is first copied into RNA.The RNA can be directly functional or be the intermediate template for a protein that performs a function. The transmission of genes to an organism's offspring is the basis of the inheritance of phenotypic traits.
