On the other hand one can argue that a theory which is based on a minimum of postulates is a better theory (since there are less assumptions involved in its construction); from this point of view the General Theory of Relativity is a gem 3. The completed formulation of the General Theory of Relativity was published in 1916 (Fig. 7.2).

Sun, 08 Jul 2018 17:13:00 GMT - In 1905, Albert Einstein determined that the laws of physics are the same for all non-accelerating observers, and that the speed of light in a vacuum was independent of the motion of all observers.

This was the theory of special relativity. It introduced a new framework for all of physics and proposed new concepts of space and time.
