Mon, 08 Oct 2018 23:16:00 GMT - Representation theory is a branch of mathematics that studies abstract algebraic structures by representing their elements as linear transformations of vector spaces, and studies modules over these abstract algebraic structures. In essence, a representation makes an abstract algebraic object more concrete by describing its elements by matrices and the algebraic operations in terms of matrix ...

- To keep to the What the Ferment Podcast theme we developed two weeks ago, I thought it would only be fitting to go a little more in depth about Lactic Acid Bacteria (LAB).. As Branden and I said in WTF Episode 2, Lactic Acid Bacteria is a very general name for a class of bacteria that are gram-positive, non-sporing, non-respiring, round or rod in shape bacteria, which produce lactic acid as a ...
